The combination of the landscape and the historic buildings is what makes Uglich unique - it seems straight out of a painting. Wander through the Kremlin, and marvel at the Princely Chamber that survived the Polish invasion and is currently the Kremlin's oldest structure (dating back to the 15th century).

Visit the Church of St. Dmitry on the Blood (No Entry). Situated at the location of Prince Dmitry's untimely death, a wooden chapel was originally built to commemorate the young prince. In 1692, the current stone church was built as replacement. Due to the disturbing nature of the prince’s death, many citizens rejected the explanation of suicide. This lead to the the city of Uglich falling into what became known as Time of Troubles.

Transfiguration Cathedral. Marvel at the five-domed Transfiguration Cathedral that stands proudly above the city. Built in 1730, the carved iconostasis is something to behold as the golden images show significant Christian images. Next to the cathedral is the beautiful 30-metre bell tower.
